

# All Stake Supply Case Study

## Revegetation in Kangaroo Valley

Location: Kangaroo Valley  
Product: Tree Guards  
Application: Native Revegetation

Based in the Shoalhaven NSW, the Kangaroo River is a beautiful waterway navigated by thousands of tourists each year.

Native vegetation in the Riparian corridor was being destroyed by rabbits and the endemic Wombat. All Stake Supply combined with Shoalhaven council and Total Ground Solutions to deliver a revegetation solution.

In this instance we used the black mesh guard over the low-cost plastic tree guards as the black mesh design allows young trees to receive the maximum amount of rain and provides greater rigidity against the native fauna. Supported by 3 stakes the black mesh guards are made from UV stabilised recycled polyethylene and can be cut to length if larger animals such as Wallabies are present.

Alternative tree guards, biodegradable weed mats and soil conditioners are available from All Stake Supply.

Our experienced staff are on hand to assist in with any questions you may have about your revegetation projects. Phone 1300 130 123 or visit our website.
